# Blanco Mixer Taps | Comfort. Aesthetics. Safety.

Without water to drink, we would not survive. So it's better to be safe than sorry. Only high quality components and certified products will give you the maximum safety that you need for the sake of your health. Look for the perfect interplay between mixer tap and sink, because that will give you maximum functionality and aesthetics in the kitchen

BLANCO taps: seal of approval for safety and hygiene. BLANCO has the technology and hygiene of its mixer taps voluntarily tested according to the stipulations of the German drinking water regulation and certified by the DVGW Cert GmbH (Certification body of the German Scientific and Technical Association for Gas and Water e.V.). With this certification BLANCO mixer taps provide one of the highest qualities currently available on the German market. The voluntary certification by the DVGW is BLANCO's documentary proof that the requirements for the protection of drinking water are being observed. Before the certification takes place, the technology and hygiene of a range of mixer taps are subjected to a large number of individual tests by various, independent institutes.

Look out for the highest safety and hygiene standards when buying a mixer tap. BLANCO mixer taps are subject to the strictest tests and additional voluntary monitoring.

Put your sink in front of the window - the BLANCO range includes lots of attractive, high quality designs

Benefit from the advantages of an extendable spray hose. It makes it easier to fill pots and vases - and also helps when cleaning the bowl

Patented jet regulators minimise limescale; elastic silicone nubs keep the spray free of limescale.

Extras such as the control for opening and closing the sink outlet, or a shut-off valve for the dishwasher, provide additional comfort

Cartridges with high quality ceramic seals are long-lasting, smooth-running & pressure-resistant. Spray hoses have an integrated non-return valve to prevent used water from flowing back into the water supply.

Untested mixer taps can significantly exceed the maximum permissible value for substances which endanger health. BLANCO mixer taps are extensively tested and certified. They thus provide maximum safety in terms of health and hygiene.

Clean water is our contribution to your health. BLANCO proves its high sense of responsibility towards people and the environment in many ways, not only by exclusively using certified quality materials in all water-conducting parts of BLANCO mixer taps, but also by continuously monitoring them by means of voluntary tests.

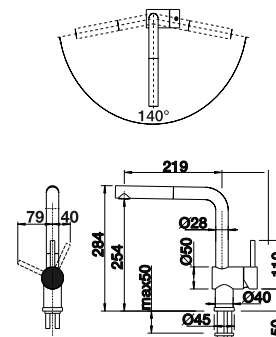

## Accessories

Item:	Code:	*Price:
Blanco Antikalk	BL00513605	R140.00
